

TRAINING COURSE

Reprogramming, Maintenance, and Differentiation of Human Pluripotent Stem Cells

- Gain hands-on training from our experts to successfully derive and maintain high-quality human induced pluripotent stem (iPS) cells.
- Learn to differentiate embryonic stem (ES) and iPS cells towards specialized cell types.

WHAT Isolation and Reprogramming of Somatic Cells to iPS Cells

Maintaining and Assessing High-Quality hPSC Cultures

Differentiating ES and iPS cells towards: Cardiomyocytes, Hematopoietic Progenitor Cells,

Neural Cell Types, or Intestinal Organoids

WHERE Fraunhofer Institute for Silicate Research – Translational Center for Regenerative Therapies,

Würzburg, Germany

WHEN May 26 – 28, 2020

PRICE 1310 EUR (1120 GBP)
